GRAFFITI / Rays

Ширина: 150 мм

A decoration designed to suggest continuous combinations and overlapping of light beams, not always clearly distinguishable, similar to a physical phenomenon that we can draw and calculate, but cannot observe with the naked eye.

GRAFFITI / Rings

Ширина: 150 мм

A geometric composition designed to highlight the elegant interplay of circles in three tones, a powerful and primeval symbol of everything, infinity and the whole.

GRAFFITI / Yuan

Ширина: 150 мм

Marquetry created using the visual merging of polygons, the octagon in particular. This composition is reminiscent of ancient minted or hammered metal coins and takes its name from the current Chinese currency.

GRAFFITI / Endless

Ширина: 150 мм

A panel designed with refined combinations of neverending tones; the use of veneers with three-dimensional figure, such as a fiddleback, gives such a depth to the individual pieces that they stand out from the sheet.

GRAFFITI / Endless

Ширина: 150 мм

A panel designed with refined combinations of neverending tones using veneers with a linear structure, granting great fluidity to the individual pieces that they emerge from the sheet.

GRAFFITI / Galaxy

Ширина: 150 мм

A charming decor designed to represent a series of interconnecting galaxies, elongated and elliptical, almost about to collide and merge harmoniously into one another, each containing clusters of stars, systems, gas and dust bound together by the reciprocal forces of gravity.

GRAFFITI / Camouflage

Ширина: 150 мм

This creation takes some camouflage patterns, with colors derived from the environment, such as the classical tones of the Mediterranean woods or Nordic forests. The choice of Bird's Eye veneers enhances the natural veins in the wood. These panels can be installed in seamless continuation.

GRAFFITI / Camouflage

Ширина: 150 мм

This creation takes some camouflage patterns, with colors derived from the environment, such as the classical tones of the Mediterranean woods or Nordic forests. The choice of a three-dimensional wood species with a fiddleback enhances the natural veins in the wood. These panels can be installed in seamless continuation.

GRAFFITI / Mirrors

Ширина: 150 мм

A combination designed with tones upon tones of delicate combinations of inlaid pieces with soft lines and curves, reminiscent of the frames of mirrors, and a fantastical game of image reflections that make us lose the notion of the Self.

GRAFFITI / Euclid

Ширина: 150 мм

The basis of the here proposed decor is based on geometrical and linear combinations of triangles that are reminiscent of an ancient mathematical theorist, close to the discovery of a new solution.

GRAFFITI / Crystal

Ширина: 150 мм

An inlay designed to combine the concept of communicating surfaces, as in a play of reflections made possible by the crystal surfaces.

GRAFFITI / Flow

Ширина: 150 мм

A composition designed to evoke fluid boundaries between different physical dimensions, enhanced by the threedimensional woods selected for this product.

GRAFFITI / Jenga

Ширина: 150 мм

This stylish design, made of tones from a single wood species, reminds us of adjoining towers of wooden blocks, precisely stacked and balanced.

GRAFFITI / Barcode

Ширина: 150 мм

The decor is thought to represent vertical and equal bands, alternatively jointed with its graphic elements giving a sharp contrast that makes it most distinguished.
